

Text Received From Lee – 21 August 2013 1:35 PM

Hello,

Just to let you know that we received the unit, thank you very much. My husband installed it late last night and was very impressed with how his skin felt after the first shower. He defiantly felt a difference. I look forward to using it from tonight. Many thanks and I will keep you updated.

Warm regards

Lee Goddard

Hello again,

I just wanted to give you a bit of feedback on our experience with the Showersoft unit so far. We have installed the unit and have definitely noticed that our water feels better. My skin feels softer after a shower and my eczema calmer. The itchiness I used to experience after every shower has definitely improved so we are very impressed and will continue to monitor

Thank you.

Hi,

Please find attached 2 photos of my arm, one taken before we installed the water softener and one today. They're not the greatest photos but I think one can see a lot less irritation on the second pic. I am such a fan of this product. For the first time since we moved to Adelaide I am enjoying my shower and not getting out and itching immediately after. The water definitely feels different and better and not itching has helped my skin so much. Obviously there is no cure for eczema but this Shower Unit has definitely helped me.

No changes to the shower routine, I always shower before going to bed and before installing the unit got into bed itchy every night and I haven't had that since. I do try to keep the water as tepid as possible as well cos very hot water is not good for eczema. If you send me a few of your brochures I'd be happy to ask my dermatologist to hand them to patients who may benefit. I'm seeing my dermatologist end September. Thank you so much

Warm regards,

LEE GODDARD
