

ecosoft water

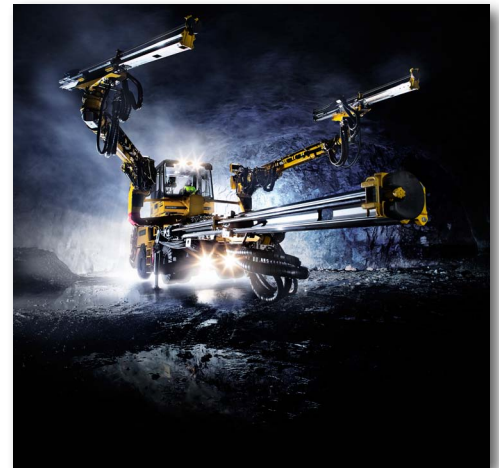

Getting tough on hard water

Mining

Ecosoft Water Conditioners have been proven to solve problems associated with Hard, Brackish & Hyper Saline water used in mining equipment in underground mines both in Australian and overseas applications.

Benefits

- Protects your investment in capital equipment
- Increases the life components
- Reduce equipment downtime
- Reduce operating costs
- Increase productivity
- Reduce maintenance
- Maintenance free
- Easy to install

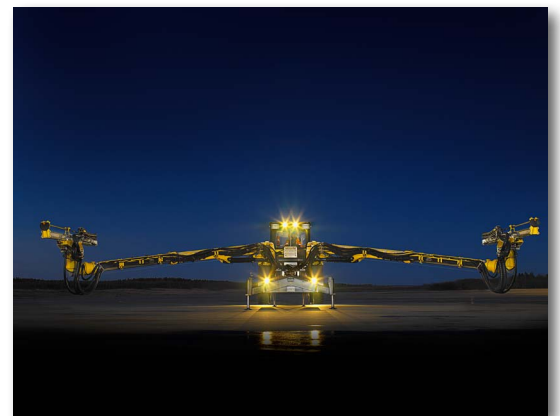

In my opinion the Ecosoft is a success on the boomers in Tara Mines as it has increased the life of the seals by over 50% at least hopefully this will also protect all the other components in the water circuit e.g. oil cooler & valves.

Damien Healy, Field Service Engineer,
Atlas Copco Construction & Mining, UK & Ireland

We have proven success with the Ecosoft units, a new rig onsite has prolonged hydraulic cooler life compared to existing rigs, the coolers were lasting approx 4 months whilst the new rig has been onsite longer than 6 with no overheating issues.

Noah Wilkinson, Drill Master – Technical, ByrneCut Australia

ecosoft water

Getting tough on hard water

Commercial/Industrial

Ecosoft Water Conditioners have been proven to solve problems associated with Hard, Brackish & Hyper Saline water across a range of diverse applications both in Australian and overseas applications.

Benefits

- Eco-friendly, chemical free
- Prevents and removes limescale
- Protects your investment in capital equipment
- Increases the life components
- Reduce equipment downtime
- Reduce operating costs
- Increase productivity
- Reduce maintenance

Since installing the Ecosoft in August 2002 there has not been any premature failure of the heating elements. Coles have specified Ecosoft be installed in all new hot water installations in Western Australia, coastal and known hard water areas.

John Mangan, Operations Manager, Edson Hot Water

We find all our customers are as impressed as we are with the way the Turbu Flow works. It truly does what it says it does!!

Faizal Gordon, Director, Portable Cooling Solutions
